

MS-ABT CAPSTONE PROJECT OVERVIEW

The Capstone course will synthesize and apply information from the Master of Science in Applied Biotechnology curriculum. Students work with a partner site to identify and design a research project in alignment with their specialty track in the areas of research and development, quality assurance and compliance, or business management. They will conduct their research by collecting and analyzing their data under the guidance of the site supervisor. Students will have a meaningful presence at their partner site or have regular meetings online, engaging with stakeholders and building relationships to address their driving question successfully. A time estimate is approximately 100 hours over the course of the semester (7 hours per week).
